Your Lifetime Safeguards!

FALCON COMPACT SERIES

Falcon Safe Compact Series comprehensive range of commercial and home safes is ideal for protecting medium sums of money as well as those companies which require higher level of security. The ease of operation makes them ideal for everyday use in the office and home environment.

DOOR AND BODY SLAB THICKNESS

The overall body thickness of 76 mm encasing Falcon FS high density refractory material and the door 105 mm pressed formed with lockcase forming an integral part of the entire door structure offering additional strength against all types of attack.

BOLTWORK AND LOCKING MECHANISM

Heavy duty 26 mm continuous steel locking hardened-chromed bolts securing the door at the front whereby the boltwork comprises of three (3) ways flexible moving bolts to the top, bottom and lockcase. The series are also anchored with full length vertical interlocking rebates system which gives four (4) ways locking system in total.

LOCKING MECHANISM

Falcon Compact Series are secured by high security three wheel mechanical combination lock with security capability of 1,000,000 combination variations. In addition to this, the door is secured by keyless cylindrical keylock which is drill resistant.

TESTING CERTIFICATION

All safes have been tested and compliances to ANSI/UL 687 : 1981 and MS 1297:1992 SPECIFICATION FOR FIRE AND BURGLARY RESISTANT OFFICE SAFES. All test have eventually undergo series of attacking such as high speed drill attack on door, hydraulic jack attack, oxy-acetylene flame cutting torch attack.

The safes have also undergone fire testing certification which is tested and compliance to JIS S 1037: 1989 FIRE RESISTIVE CONTAINERS. The series have been tested and rated for 2 hours fire resistant.
